## Cardiologia Guadalajara 7ma Edicion Pdf 948

cardiologia guadalajara 7ma edicion pdf 948 cardiologia guadalajara 7ma edicion pdf 948 . YEAR 4. ACCESSORY ESCAPE-HELMET KIT. This is a classroom version.Q: How to remove the text from a control that has a charSequenceLabel I've got a Problem. I have a button and a charSequenceLabel, where I want to show a text. I want the text to be ready in the button, when I hit it, but how can I remove the text when my view disappears? A: Set button.text = String() and clear charSequenceLabel.text = String() in viewDidDisappear EDIT: I've see your comments in other questions about the same issue. Please don't delete your question just because you have an answer or you think you have found a solution. It might help someone searching for the same issue. Q: Largest number containing exactly two rational numbers Is there a known way to find the largest number n that contains exactly 2 rational numbers  $a/b$  and  $c/d$  such that  $a^2+b^2=c^2+d^2$ ? By "largest number", I mean that for a given  $n$ , there are infinite rational numbers  $a/b$  and  $c/d$  satisfying  $a^2+b^2=c^2+d^2=n$  as a gcd. I suspect that the largest number is either irrational or transcendental, but I'm struggling to prove this. If it isn't, I'd appreciate any ideas on how to approach the problem. A: This is a nice unsolved problem, the first nontrivial case is the square of a prime of the form  $17 + 7k$ . This was studied by Schur. It is a celebrated result that the largest squarefree integer  $x$  with  $a^2+b^2=x$  contains only a finite number of  $a/b$ 's, and this problem is to find the largest  $x$ . There is a famous theorem that if  $x$  is the largest of its kind, then  $p$  must be a prime factor of  $x$ , so this gives a strong condition that can be used to find the largest  $x$ .
